

Contents

MARINE AND TERRESTRIAL GEOLOGY AND GEOPHYSICS

- 1 Shackleton Glacier Project, 1995–1996, D.H. Elliot
- 3 Permian to Jurassic palynological collections in the Shackleton Glacier area, R.A. Askin and T.J. Cully
- 5 Permian and Triassic biogenic structures, Shackleton Glacier and Mount Weaver areas, Transantarctic Mountains, M.F. Miller and S.E. Smail
- 8 Preliminary analysis of Triassic vertebrates from the Shackleton Glacier region, W.R. Hammer, W.J. Hickerson, and J.W. Collinson
- 9 New observations on the Triassic stratigraphy of the Shackleton Glacier region, J.W. Collinson and W.R. Hammer
- 12 The Late Cenozoic Sirius Group of the upper Shackleton Glacier region, Transantarctic Mountains, P.-N. Webb, D.M. Harwood, M.J. Hambrey, L.A. Krissek, A.C. Ashworth, M.C.G. Mabin, and F.G. Fabel
- 14 The sub-Sirius Group erosion surface at Roberts Massif, upper Shackleton Glacier region, Transantarctic Mountains, P.-N. Webb, D.M. Harwood, M.J. Hambrey, L.A. Krissek, A.C. Ashworth, and M.C.G. Mabin
- 16 Stratigraphy of the Sirius Group, upper Shackleton Glacier region, Transantarctic Mountains, P.-N. Webb, D.M. Harwood, M.J. Hambrey, L.A. Krissek, A.C. Ashworth, and M.C.G. Mabin
- 18 New geologic constraints on basement rocks from the Shackleton Glacier region, A. Grunow, J. Encarnacion, T. Paulsen, and A.J. Rowell
- 20 Geologic and thermochronologic studies along the front of the Transantarctic Mountains near the Shackleton and Liv Glaciers, P.G. Fitzgerald, S.L. Baldwin, S.R. Miller, and G. Dingle
- 23 Structural and geomorphological observations at Cape Surprise, Shackleton Glacier area, S.R. Miller, P.G. Fitzgerald, S.L. Baldwin, and G. Dingle
- 25 Lakes in dry valleys at 85°S near Mount Heekin, Shackleton Glacier, D.H. Elliot, J.W. Collinson, and W.J. Green
- 27 Seed fern reproductive organs from the Shackleton Glacier area, E.L. Taylor, T.N. Taylor, N.R. Cúneo, A. Archangelsky, and H. Kerp
- 29 Permian and Triassic paleosols and paleoenvironments of the central Transantarctic Mountains, Antarctica, G.J. Retallack, E.S. Krull, and S.E. Robinson
- 33 Paleoenvironment of the Triassic therapsid *Lystrosaurus* in the central Transantarctic Mountains, Antarctica, G.J. Retallack and W.R. Hammer
- 35 Late Triassic hummocky coals near Schroeder Hill, central Transantarctic Mountains, Antarctica, E.S. Krull
- 37 Geologic studies on rocks of the Jurassic Ferrar Group, D.H. Elliot, T.H. Fleming, and C.M. Gero
- 39 Three-dimensional magmatic filling of Basement sill revealed by unusual crystal concentrations, B.D. Marsh and J.R. Philipp
- 41 Digital recording of the seismicity of Mount Erebus volcano, November 1994 to June 1996, R.L. Knight, R.C. Aster, P.R. Kyle, A.K. Ameko, and R.R. Dibble
- 44 Global positioning system static sites along the Victoria Land coast of Antarctica, P.A. Berkman, C.M. Goad, and J.H. Kwon
- 46 Re-evaluation of the structure and stratigraphy of the Heritage Range, Ellsworth Mountains, E.M. Duebendorfer and M.N. Rees

LAND-ICE STUDIES AND GLACIAL GEOLOGY

- 49 Variations of the west antarctic ice streams associated with sea-level and climatic changes during the Late Pleistocene, M. Verbitsky and B. Saltzman
- 51 Ice-core glaciochemical reconnaissance in inland West Antarctica, K.J. Kreutz, P.A. Mayewski, M.S. Twickler, and S.I. Whitlow
- 53 Preliminary velocity field in the onset region of ice stream D, West Antarctica, R.A. Bindshadler, X. Chen, and P.L. Vornberger

- 55 Internal stratigraphy from ground-based radar studies at Siple Dome summit, R.W. Jacobel, A.J. Fisher, and N.M. Sundell
 - 57 Annual dust cycles measured in a short ice core from Siple Dome, West Antarctica, M. Ram and M.R. Stolz
 - 58 Recent migration of Siple Dome divide determined from 1994 radio-echo sounding measurements, N.A. Nereson and C.F. Raymond
 - 60 Analysis of ground-based geophysical fieldwork in West Antarctica, C.R. Bentley, T.S. Clarke, C. Liu, N.E. Lord, and S. Shabtaie
 - 62 Airborne radar sounding over west antarctic ice streams, C.R. Bentley, C. Liu, and N.E. Lord
 - 64 Monitoring of basal seismicity rates of ice stream C, West Antarctica: Preliminary results of the Antarctic Microearthquake Project, 1994–1995 and 1995–1996, S. Anandakrishnan
 - 66 Surface exposure dating of glacial landscapes and deposits in the Trans-antarctic Mountains using *in situ* induced cosmogenic helium-3 and neon-21, L.A. Bruno, H. Baur, P. Signer, R. Wieler, and C. Schlüchter
 - 67 Basal processes at sub-freezing temperatures: Meserve Glacier revisited, H. Conway, K. Cuffey, A.M. Gades, B. Hallet, C.F. Raymond, and R. Sletten
 - 68 Glacial/interglacial variations in the flux of atmospherically transported diatoms in Taylor Dome ice core, D.E. Kellogg and T.B. Kellogg
 - 71 Acquisition of borehole temperature measurements from Taylor Dome and the dry valleys for paleoclimate reconstruction, G.D. Clow and E.D. Waddington
 - 72 Relation of ice face melting structures to oceanic characters using remotely operated vehicle observations, Mackay Glacier Tongue, Granite Harbor, J. Liu and R.D. Powell
 - 75 On the Mertz and Ninnis Glaciers, eastern Antarctica, G. Wendler, K. Ahlnäs, and C. Lingle
 - 76 A dark line on the McMurdo Ice Shelf, I.M. Whillans and G.S. Hamilton
 - 78 Deglacial chronology of the western Ross Sea, B.L. Hall and G.H. Denton
 - 81 Subglacial sediment transport and ice-stream behavior, R.B. Alley, S. Anandakrishnan, and K.M. Cuffey
 - 83 Coring for microbial records of antarctic climate, G.S. Wilson, P. Braddock, S.L. Forman, E.I. Friedmann, E.M. Rivkina, J.P. Chanton, D.A. Gilichinsky, D.G. Fyodorov-Davidov, V.E. Ostroumov, V. Sorokovikov, and M.C. Wizevich
 - 86 Global positioning system measurements of ice-sheet mass balance using the “coffee-can” method, G.S. Hamilton and I.M. Whillans
 - 94 Analysis of laminated antarctic marine sediments, A. Leventer and L. Stevens
 - 97 Porewater chemistry of Ross Sea diamictos: A till or not a till? T.W. Rayne and E.W. Domack
 - 99 Bulk salinity characteristics of first-year sea ice in the Pacific sector of the southern oceans, T. Maksym and M.O. Jeffries
 - 101 Bottom water distribution in the Weddell Sea, A.L. Gordon
 - 103 Profiling the South Pacific antarctic continental shelf, C. Giulivi and S. Jacobs
 - 105 Light-saturated primary production in antarctic coastal waters, M.A. Moline, B.B. Prézelin, and H. Claustre
 - 107 Radium-226/barium ratios for dating biogenic carbonates in the southern oceans: Preliminary evidence from coastal mollusk shells, P.A. Berkman and T.-L. Ku
-
- ## MARINE BIOLOGY
-
- 109 Development in juvenile Weddell seals: Diving, physiology, nutritional status, and survivorship, J.M. Burns, M.A. Castellini, K.K. Hastings, and T. Zenteno-Savin
 - 110 Antarctic seabird ecology and demography in Admiralty Bay, King George Island, Antarctica, T.R. Mader, P. Ciaputa, E. Goetze, N.J. Karnovsky, W.Z. Trivelpiece, and S.G. Trivelpiece
 - 112 Growth and development in antarctic fulmarine petrels, P.J. Hodum, K.L. Gerhart, and W.W. Weathers
 - 113 Phenotypic plasticity in the nototheniid fish *Trematomus newnesi* from McMurdo Sound, Antarctica, J.T. Eastman
-
- ## OCEAN SCIENCES
-
- 89 Initial results from marine sediment cores from the east-central Ross Sea, K.J. Licht and D. Duran
 - 92 Hydrothermal and hydrographic surveys of the Bransfield Strait: Results from cruise *NBP95-07*, G.P. Klinkhammer, C.S. Chin, C. Wilson, and L.A. Lawver

- 115 Temperature compensation of enzymatic activities in brain of antarctic fishes: Evidence for metabolic cold adaptation, H.G. Kwall and G.N. Somero
- 117 Physiological energetics of "pelagic" and "demersal" development in the antarctic sea urchin *Sterechinus neumayeri*, A.G. Marsh and D.T. Manahan
- 119 The kinetics of the cortical reaction and respiratory burst following fertilization of *Sterechinus neumayeri* eggs, M.D. Stokes, B. Stewart, and D. Epel
- 121 Changes during development in activities of the sodium/potassium-ATPase enzyme in the antarctic sea urchin *Sterechinus neumayeri*, P.K.K. Leong and D.T. Manahan
- 122 Occurrence of *Gromia oviformis* in McMurdo Sound, S.S. Bowser, M. Marko, and J.M. Bernhard

ROSS SEA BLOOM DYNAMICS EXPERIMENT

- 125 Food web structure and sinking particulate material in the Ross Sea polynya: December 1995 and January 1996, M.M. Gowing, D.L. Garrison, H. Kunze, and E.J. Lessard
- 127 Dimethylsulfide concentrations in the southern Ross Sea during austral summer 1995–1996, G.R. DiTullio
- 128 Dissolved iron and manganese in surface waters of the Ross Sea, austral summer 1995–1996, P. Sedwick, G. DiTullio, and D. Mackey

ANTARCTIC MARINE LIVING RESOURCES PROGRAM

- 131 The U.S. Antarctic Marine Living Resources (AMLR) program: 1995–1996 field season activities, J.E. Martin, R.P. Hewitt, and R.S. Holt
- 134 Distribution of volume backscattering strength near Elephant Island in the 1996 austral summer, R.P. Hewitt and D.A. Demer
- 137 Primary production and distribution of chlorophyll-*a* around Elephant Island, Antarctica, January to March 1996, V.E. Villafañe, E.W. Helbling, O. Holm-Hansen, and M.P. Hernando
- 141 Inorganic nutrient concentrations around Elephant Island, Antarctica, January to March 1996, N. Silva S., T.C. Calvete, O. Holm-Hansen, V.E. Villafañe, and E.W. Helbling
- 145 Krill demography in the Elephant Island area, January to March 1996, V. Loeb and V. Siegel
- 149 Salps and other macrozooplankton sampled, January to March 1996, V. Loeb and D. Outram
- 153 The 7-year hitch—a meander in the circulation—near Elephant Island, A.F. Amos, A.R. Wickham, and C.C. Rowe
- 155 Fur seal and penguin studies at Seal Island, South Shetland Islands, Antarctica, 1995–1996 austral summer, W.T. Cobb, R.S. Holt, W.A. Armstrong, W.R. Meyer, and B.G. Walker

PALMER LONG-TERM ECOLOGICAL RESEARCH

- 157 Palmer Long-Term Ecological Research (LTER): Annual January cruise for 1996 (PD96-1), M. Vernet and K.S. Baker
- 160 Annual season October 1995 through March 1996, K.S. Baker, W.A. Kozlowski, M. Vernet, J.L. Jones, L.B. Quetin, R.M. Ross, R.C. Smith, and W.R. Fraser
- 162 Palmer Station air temperature 1974 to 1996, K.S. Baker
- 164 Annual season sampling on station, R.C. Smith, J.L. Jones, L.B. Quetin, R.M. Ross, K.S. Baker, W.A. Kozlowski, M. Vernet, and W.R. Fraser
- 167 Small boat design for water column sampling, R.C. Smith, L.B. Quetin, J.L. Jones, D.W. Menzies, and T.A. Newberger
- 170 Open-water profiling ultraviolet radiometer albedo measurements, K.W. Patterson, P.L. Handley, and R.C. Smith
- 172 Seasonal comparison of spatially averaged estimates of krill abundance, C.M. Lascara
- 174 Interannual variability in near-surface hydrography, E.E. Hofmann, C.M. Lascara, J.M. Klinck, and D.A. Smith
- 176 Temporal variability in the location of the Antarctic Circumpolar Current along the west Antarctic Peninsula continental shelf, J.M. Klinck
- 179 Comparison of meteorological observations from R/V *Nathaniel B. Palmer* to those at Palmer Station, J.M. Klinck and D.A. Smith

- 181 Temporal variability in primary production in Arthur Harbor during the 1995–1996 growth season, M. Vernet, W. Kozlowski, J. Rosenfield, and A. Greaves
 - 183 Paleohistory of the Palmer LTER region: Palmer Deep sedimentary record, M. LoPiccolo and E. Domack
- MCMURDO DRY VALLEYS
LONG-TERM ECOLOGICAL
RESEARCH**
-
- 187 McMurdo Dry Valleys Long-Term Ecological Research (LTER): An overview of 1995–1996 research activities, S.E. Jennings-Mays and R.A. Wharton, Jr.
 - 189 The role of terminus cliff melt in streamflow, Taylor Valley, Antarctica, K.J. Lewis, A.G. Fountain, and P. Langevin
 - 191 Solar radiation on glaciers in Taylor Valley, Antarctica, G.L. Dana, R.A. Wharton, Jr., and A.G. Fountain
 - 194 Spatial variation of glacier mass balance in Taylor Valley, Antarctica, A.G. Fountain, K.J. Lewis, and G.L. Dana
 - 196 Stream discharge as a function of ambient temperature and incoming shortwave radiation in Taylor Valley, Antarctica, D.L. Moorhead and D.M. McKnight
 - 198 Geophysical determination of bathymetry and morphology of Taylor Valley lakes, P.T. Doran, R.A. Wharton, Jr., and J.P. Schmok
 - 201 Characterization of protozoan communities in lakes Hoare and Fryxell using artificial substrates, R.L. Kepner, Jr., and R.A. Wharton, Jr.
- 203 Genetic diversity of soil nematodes in the McMurdo Dry Valleys of Antarctica, E.M. Courtright, D.W. Freckman, R.A. Virginia, and W.K. Thomas
 - 205 Density-driven mixing in Lake Hoare? W.B. Lyons, K.A. Welch, S.W. Tyler, and P. Sharma
 - 206 Phosphorus deficiency and alkaline phosphatase activity in lakes of Taylor Valley, Antarctica, J.E. Dore and J.C. Priscu
- TERRESTRIAL BIOLOGY**
-
- 209 Natural abundance of carbon and nitrogen isotopes in potential sources of organic matter to soils of Taylor Valley, Antarctica, M.B. Burkins, C.P. Chamberlain, R.A. Virginia, and D.W. Freckman
 - 211 The role of phytoplankton extracellular release in bacterioplankton growth of Taylor Valley Lakes, Antarctica, C.D. Takacs and J.C. Priscu
 - 213 Microbially mediated transformations of manganese in Lake Vanda, B.J. Bratina, T.M. Schmidt, and W.J. Green
 - 215 Lake-ice algal phototroph community composition and growth rates, Lake Bonney, dry valley lakes, Antarctica, J.L. Pinckney and H.W. Paerl
 - 216 Photosynthetic characteristics of cyanobacteria in permanent ice covers on lakes in the McMurdo Dry Valleys, Antarctica, C.H. Fritsen and J.C. Priscu
- 218 Nitrogen fixation within permanent ice covers on lakes in the McMurdo Dry Valleys, Antarctica, A.M. Grue, C.H. Fritsen, and J.C. Priscu
 - 220 Ice aggregates as a microbial habitat in Lake Bonney, dry valley lakes, Antarctica: Nutrient-rich microzones in an oligotrophic ecosystem, H.W. Paerl and J.L. Pinckney
 - 223 Antarctic lake-ice microbial consortia: Origin, distribution, and growth physiology, J.C. Priscu and C.H. Fritsen
 - 224 Cyanobacterial communities associated with mineral particles in antarctic lake ice, D. Gordon, B. Lanoil, S. Giovannoni, and J.C. Priscu
 - 226 Impacts of climate change on antarctic vascular plants: Warming and ultraviolet-B radiation, T.A. Day, C.W. Grobe, and C.T. Ruhland
- STUDIES OF OZONE
DEPLETION AND ITS EFFECTS**
-
- 229 Photoinhibition in antarctic phytoplankton by ultraviolet-B radiation in relation to column ozone values, O. Holm-Hansen, V.E. Villafañe, and E.W. Helbling
 - 231 Correlations between ozone loss and volcanic aerosol at altitudes below 14 kilometers over McMurdo Station, Antarctica, T. Deshler, B. Nardi, D.J. Hofmann, and B.J. Johnson

LOWER ATMOSPHERE STUDIES

- 235 Temporal variation of snow accumulation rate at two Ross Ice Shelf locations influenced by katabatic winds, D.A. Braaten
- 237 Recent trends in stratospheric temperatures during austral springtime, W. Dou and T.R. Parish

AERONOMY AND ASTROPHYSICS

- 239 Palmer Station measurements of radio atmospherics associated with upward electrodynamic coupling phenomena between thunderstorms and the mesosphere/lower ionosphere, S.C. Reising, U.S. Inan, and T.F. Bell
- 241 Balloonborne solar telescope circles Antarctica in 19 days, D.M. Rust
- 243 Deciphering the enigma of sunspot formation, S.M. Jefferies
- 244 Solar wind pressure and the generation of Pc 1 waves in the magnetosphere, R.L. Arnoldy, M.J. Engebretson, and J. Alford
- 246 Patterns in high-latitude observations of Pc 1–2 emissions, M.J. Engebretson, L.P. Dyrud, P.T. Newell, W.J. Hughes, R.L. Arnoldy, and H. Fukunishi
- 249 Low-frequency auroral hiss observations at high geomagnetic latitudes, J. LaBelle, J.-A. Perring, M. Trimpi, and A.T. Weatherwax
- 252 Characteristics of localized ionospheric disturbances deduced from very-low-frequency radio measurements at Palmer Station, S. Lev-Tov and U.S. Inan

- 255 Low-magnitude, long-period magnetic pulsations observed deep in the southern polar cap, V.O. Papitashvili, C.R. Clauer, S.B. Musko, B.A. Belov, O.A. Troshichev, and M.G. Gudkov
- 257 Large-amplitude hydro-magnetic waves on open geomagnetic field lines, A. Wolfe, L.J. Lanzerotti, C.G. MacLennan, and A.T. Weatherwax
- 260 Infrared radiation studies of the winter marine antarctic atmosphere, J.L. Simmons, K. Stamnes, F. Murcray, and X. Liu

SUPPORT AND SERVICES

- 263 Support Office for Aerogeophysical Research (SOAR): West antarctic field activities (1994–1996), T.G. Richter, J.L. Williams, D.D. Blankenship, and R.E. Bell
- 265 Undergraduate research initiative: Antarctic marine geology and geophysics, E.W. Domack
- 267 The geodesy and mapping program of the United States in Antarctica, J.L. Mullins and L.D. Hothem
- 268 Subsurface soil temperature measurements at McMurdo Station, Antarctica, M.A. Tumeo and M.A. Cummings
- 272 The Amundsen–Scott South Pole Station water well: A new source of micro-meteorites, S. Taylor, J. Lever, R. Harvey, and J. Govoni
- 275 Effects of tourism on the reproductive success of Adélie penguins at Palmer Station: Preliminary findings, D.L. Patterson, E.J. Holm, K.M. Carney, and W.R. Fraser
